

DRG FOODTECHNOLOGY offers a wide range of machines and systems for the processed foods industry, in the oven baked foods sector, the pastry sector and gastronomy. Our machines and systems are manufactured in series or customized, and can be integrated on the line or used off the line.

DOSING AND TRANSFER SYSTEMS

PROTEUS
OILING SYSTEM FOR PANS
HERCULES
TOMATO DOSING
TESEUS
LIQUID FOOD DOSING
HYDRA
VERTICAL FOOD PUMP

FILLING SYSTEMS

PROTEUS
OILING SYSTEM FOR FILLING
PELIUS
DOSING SYSTEM FOR SPICES AND FLAVORINGS
KERBEROS
CHEESE, HAM AND FILLING DOSING SYSTEM

CUTTING SYSTEMS

TEMIS
HORIZONTAL CUTTING SYSTEM
AEOLUS
WATERJET CUTTING SYSTEM

WASHING SYSTEMS

POSEIDON
AUTOMATIC WASHING SYSTEM FOR PANS AND BASKETS

SPECIAL SYSTEMS

HERMES
AUTOMATIC TRANSPORT SYSTEMS
GOLGOS
DOUGH PRESSING IN CONTAINERS
ACASTOS
TRAY COVERING SYSTEM

WHY CHOOSE US?

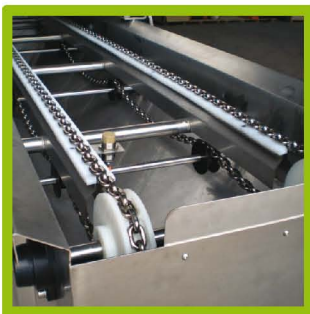

- We offer the best solutions with the least impact for the production line, optimizing existing machines and processes, as well as integrating new systems
- Our technical department uses the most modern hardware and software design technologies, including CAD 2D/3D, electric CAD and PLC programming software
- We develop customized solutions based on various specifications in collaboration with the technical departments of our customers, integrating machines and systems in existing layouts or in the design process
- All of our machines comply with community safety standards and we constantly update our products with the latest available technologies

DRG FOODTECHNOLOGY guarantees onsite maintenance and assistance within 24/48 hours or in real time through our remote supervision and diagnostic services (remote monitoring and video assistance).

Since 2001, **DRG FOODTECHNOLOGY** has provided advanced solutions in the foods sector, permitting production of industrial quantities with handcrafted quality in sustainable conditions. We are specialized in providing services and designing systems to improve productive processes, rendering them more efficient and automated, in total compliance with system safety standards and food regulations. Thanks to constant commitment to Research and Development, we produce series and custom machines and systems for the processed foods industry, in the oven baked products sector, pastry sector and gastronomy.

We mix, pump, dose and spray your process and filling liquids, like water, oil, brine, sauces.

We transfer, weigh, dose and distribute your products in grains, powder and seeds, like sugar, salt, flour, oregano, poppy seeds, sesame seeds, sunflower seeds. We cut your oven products, for portioning and for filling, with vertical and horizontal cutting systems. We wash your pans, baskets and bins, at low and high pressure.
